THE BEGINNING OF ENTREPRENEURIAL JOURNEY

Countless aspiring entrepreneurs have innovative business ideas but don't have the skills or qualities to execute them. Others have entrepreneurial skills and qualities but lack an idea to pursue. Even those with a brilliant idea and robust skill set can fail to get their project off the ground if they don't have access to funding. Successful entrepreneurship requires all of these components.

The good news is: Entrepreneurs aren't born—they're made. With the right training, you can succeed. As you determine the next step in your career, consider how HBS Online's entrepreneurship and innovation courses can benefit you, which include:

Disruptive Strategy

This course equips you with the skills and techniques to develop executive-level strategy, organize for innovation, and discover customer jobs to be done.

Entrepreneurial Marketing

This course teaches you how to craft and continually adapt go-to-market strategies for new ventures, products, and services with a proven toolkit for identifying, capturing, and influencing customers and create a viable, scalable business using limited resources.

Leading Change & Organizational Renewal

This course equips you with practical frameworks and skills for setting strategy and building an ambidextrous organization that can execute short-term success and long-term innovation. This course empowers you to turn an idea into a viable venture through learning how entrepreneurs validate concepts with structured experiments, refine their business strategy, and raise the capital necessary to create value and grow their business. **Launching Tech Ventures** This course provides the tools and frameworks to navigate the management challenges, experimental research, and venture capital process that categorize the early stage of launching a scalable tech startup.

Negotiation Mastery

This course teaches you to close deals that might otherwise be deadlocked, maximize value in the agreements you reach, and resolve differences before they escalate into costly conflicts.

Design Thinking & Innovation

This course enables you to leverage fundamental design thinking principles and innovative problem-solving tools to address business challenges and build products, strategies, teams, and environments for optimal use and performance.

Values You'll Unlock & walk away with
